

Feel right.  
At home.

ProteX

**AT-HOME**  
SEMEN SAMPLE  
COLLECTION

# Start your fertility journey at home.

Traditional in-clinic semen collection methods can be so stressful. From time constraints to awkward collection rooms... It's time for a change. Choose ProteX™ and produce a higher quality sample – comfortably and on your own schedule.

## The easy way is the ProteX way.

### Your CONVENIENCE

Collect your sample in the comfort of your own home, at your own pace.

### Your CHOICE

As a couple, you can decide on the best setting and perfect moment.

### Your BEST

Produce and protect a higher quality sample with our scientifically engineered container.

### Your SCHEDULE

Collect when you want and enjoy a 24-hour window to drop off your sample.

# Start your fertility journey at home.

Traditional in-clinic semen collection methods can be so stressful.

From time constraints to awkward collection rooms... It's time for a change. Choose ProteX™ and produce a higher quality sample – comfortably and on your own schedule.

## Bring intimacy back.

Remember where it all started... and continue it all together. You decide the when, where, and how of your sample collection, which means it's as intimate as you want to be.

## Our science. Your convenience.

Engineered by a leading team of fertility research scientists, our semen collection container is easy to use, and is designed to collect and store your sample in an optimal environment. Plus, you can break free from the traditional 1-hour time constraint with up to 24 hours for sample return.
